

A Level Biology

Develop your understanding of the biological world around you, from cells, to ecosystems, and beyond!

Why choose this subject?

Choose A Level Biology if you love Science. You will learn about the biological structures and processes that occur in all living things and allow life to exist!

What will I study?

A Level Biology explores how living things work, building on knowledge from GCSE, starting with the fundamental concepts of Cells and Biological Molecules, and continuing to explore Genetics and Inheritance, the biochemistry of Respiration and Photosynthesis, and Ecology. You will carry out practical work where you will learn to critically analyse data and gain knowledge of a wide range of biological concepts.

Where can this subject take me?

Biology can be used as an entry qualification for a variety of higher education courses including biological science courses, environmental science, medicine and healthcare sciences. As with other Science A Levels, Biology is a broadly valued subject due to the skills it teaches students.

Entry Requirements

5 GCSE English

5 GCSE Maths

6/6 Combined
Science
6 Biology
