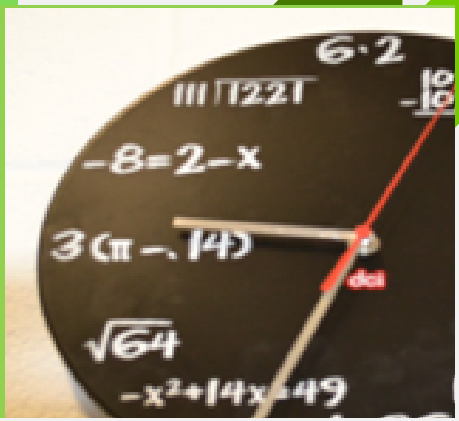
A Level Further Maths

For those who love the 'why' behind the 'how'. Explore advanced concepts, sharpen logic, and unlock the power of mathematical thinking



Why choose this subject?

This course is for those students who wish to extend and deepen their mathematical knowledge in addition to A Level Mathematics.

What will I study?

You will study a range of content which goes beyond the scope of A Level Mathematics. This includes complex numbers, matrices, polar coordinates and hyperbolic functions.

Where can this subject take me?

This course is particularly valuable for those considering degrees in mathematics, physics, engineering, computer science, or economics, and it demonstrates a high level of academic commitment and analytical ability. If you enjoy mathematical challenge and want to push your understanding further, Further Maths is the perfect choice.

Entry Requirements

8 GCSE Maths
