A Level Geography

Develop your understanding of the processes that shape the world and our lives.

Why choose this subject?

Geography helps you make sense of the world, exploring global challenges like climate change, migration, and urbanisation. It develops analytical, research, and decision-making skills that are valued by universities and employers. A perfect course if you are curious about people, places, and the planet.

What will I study?

As part of the course, you'll study physical and human geography topics like coastal systems and global governance. You'll complete an individual investigation using fieldwork data, attend two compulsory UK field trips, and have the option to join a residential visit to Iceland or Napoli.

Where can this subject take me?

A Level Geography opens the door to a wide range of exciting careers, including environmental consultancy, urban planning, GIS and digital mapping, climate change analysis, international development, and teaching. Geography develops valuable skills in data analysis, research, problem-solving, and fieldwork, making it a highly respected and versatile subject for both university study and future employment.
