

AS Mathematical Studies

Confident with numbers, ready for life. Core Maths builds real-world skills for study and work.

Why choose this subject?

On this course, you will develop real-life mathematical skills in areas such as finance and statistical methods. You will use Mathematical techniques to model the real world, for instance analysing the electricity production of a wind-farm.

What will I study?

You will also learn to estimate an answer to questions such as: How many times does a heart beat in a lifetime? For how many hours is the washing machine on per year for an average family? How many piano tuners are there in Bristol?

Where can this subject take me?

Achieving this qualification would demonstrate to universities and employers that you are confident and resilient when problem solving and dealing with data.

We highly recommend this course for anyone studying science subjects, geography, psychology or business studies.

Entry Requirements

5 GCSE Maths

This is a 1 year course to be studied in addition to your other subjects.
